

## ACCESS INFO

### **Registrations & Workshops**

We have designed our event web pages with intention, reflecting on the experience of those using screen readers or requiring higher contrast fonts. Presenters will be advised on ways to promote access to their session.

### **Feedback & Support Options**

Each registrant is asked, "Is there anything else you'd like us to know?" before registering, and after the event we will share an opportunity for attendees to provide feedback on their event experiences.

### **Recorded Sessions**

The majority of our sessions will be recorded, including opening plenaries, workshops, and closing community builders—excluding break out rooms. Event registrants will have access to the recorded sessions for 30 days following the end of the event. If an event registrant missed a portion of the event, they will be able to access any recorded portion until September 7, 2020.

### **Transcripts**

Transcripts will be provided when the recorded sessions are shared to attendees.

### **Multiple Ways to Participate**

Attendees are welcome to experience the event as they'd like. Options include: video on or off, join by phone only (with slides available on our event page), use chatbox as desired, raise hand to speak (except during opening plenary), and more.

We encourage you to eat, stretch, step away temporarily to take care of your needs, and utilize the breaks between sessions to care for yourself in ways that support your learning.

### **Your Personalized Daily Schedule**

We will provide instructions on how to navigate the scheduling process, and we will share the Zoom links to the sessions in your personalized daily schedule directly to your email to help make accessing the event easy. Our process of confirming that all event registrants have created their event schedule (if they plan to attend day-of) will help ensure that no one misses their opportunity to access the event.

### **Live Tech Support**

During the events, we will offer live support via in-room hosts to help with troubleshooting technology. Customer Service will be available before, during, and after the event to support all attendees in navigating the technology being used to host the event.

## **Please Contact Us**

If you have other requests for accommodations: [info@ydekc.org](mailto:info@ydekc.org) or 206-336-6910.
