

# (Re)Building Our Mycelium Network

## 2021 YDEKC Member Summit

Use this worksheet to jot down the people, organizations, and groups you'd like to invite into your network!

"The word 'mycelium' means 'more than one'. The mycelium organism is a dynamic root system of mushrooms that utilizes trust as a mechanism to build and sustain a vast, reciprocal, underground network that connects the roots of trees and plants and skillfully shares nutrients and resources to support the health of the entire ecosystem... The mycelium communication highway recognizes and believes in the collective ability to channel and receive nutrients where needed, protect against parasites, and expand roots into necessary sites of growth" – Adaku Utah
